

SECURITY TESTING SERVICES

**BUILD
CONFIDENCE,
SECURE CYBER
AND RESPOND
EFFECTIVELY.**

YOU'VE INVESTED IN SYSTEMS AND TECHNOLOGY TO DEFEND YOUR BUSINESS, BUT HOW SAFE IS YOUR SENSITIVE DATA?

OUR RANGE OF CONSULTANCY SERVICES HELP DETERMINE WHETHER YOUR APPLICATIONS, NETWORKS, GEOGRAPHICAL LOCATIONS, PROCESSES AND EVEN PEOPLE ARE RESILIENT ENOUGH TO WITHSTAND CYBER SECURITY ATTACKS.

IRM apply the mentality of a hacker to your organisation, across all disciplines – so you know for sure if you have any vulnerabilities, where they exist and how to fix them.

+ 20 experienced testing experts

+ 20 CHECK accredited, including Team leaders in both application and infrastructure

OUR SERVICES

1 RED TEAMING

A team of consultant specialist assigned to relentlessly and diligently track down possible sources of failure in a business's security posture. From physical entry to computer hacking, engineering the human element and everything in between.

2 WEB APPLICATIONS

Using the methods of real-world attackers in a controlled manner, IRM ensure that our client's applications are safe, secure and adhere to security best practice. Our testing portfolio covers a wide range of applications, including smartphone, client-server, web and web service applications.

3 NETWORK INFRASTRUCTURE

IRM's team of security consultants perform penetration tests on a range of external and internal networks to find vulnerabilities before they impact business operations and reputation.

4 WIRELESS

IRM's Wireless Testing service evaluates the security posture of your wireless networks and their compliance with pre-defined standards.

5 MOBILE APPLICATIONS

IRM's Mobile Application Testing service has been created to give you peace of mind that your company's applications remain secure and operate effectively for everyone, everywhere and at all times.
